Influenza A

IMMUNOGEN: Influenza A (Texas strain).

REACTIVITY ACCORDING TO MANUFACTURER:
This antibody recognizes the nucleoprotein. It is reactive with more than 50 separate isolates from H1 through H14.

STAINING PROCEDURE ACCORDING TO MANUFACTURER:
Immunofluorescence on acetone-fixed sections: Suggested starting dilution 1/10-1/20. Not tested in immunohistochemistry on paraffin sections.

WORKING DILUTION: 1/200. Pretreatment with proteinase K.

METHOD: LSAB 2-PO. 30 min. RT.

CELLS/TISSUES STAINED (porcine tissues unless specified):
Lung: Staining of respiratory epithelium (either nuclear or cytoplasmic or both). Mononuclear cells stained also in alveolar interstitium.
