Mycoplasma hyopneumoniae

IMMUNOGEN: Mycoplasma hyopneumoniae strain 232.

REACTIVITY ACCORDING TO MANUFACTURER:
Porcine.

STAINING PROCEDURE ACCORDING TO MANUFACTURER:
It has been tested for ELISA and immunoblotting methods.

METHOD: LSAB 2, 1h, RT. It is being tested again to determine the optimal dilution of the link (anti-IgM) antibody.

CELLS/TISSUES STAINED (porcine tissues unless specified):
Staining of the apical epithelium of airways. There is also strong staining of plasma cells and mild to weak staining of some nuclei of respiratory epithelium.
