Listeria monocytogenes

ANTISERUM: Difco (2302-50-0). Rabbit polyclonal antibody against O antigen.

REACTIVITY ACCORDING TO MANUFACTURER:

WORKING DILUTION: 1/6400. No pretreatment.

METHOD: LSAB 2-PO. 30 min. RT.

CELLS/TISSUES STAINED (GOAT UNLESS SPECIFIED):

Brain infected with Listeria sp.: Numerous bacteria free or in close proximity (intracellular?) to neutrophils. Some neurons contain bacteria. Areas of perivascular cuffing or histiocytic reaction seldom have demonstrable antigen.
