Assignment 2

Your answers must be typed. Be sure to place your name and social security number on the material you hand in.

1. What is the concept they are attempting to measure?
2. Nominally define this concept.
3. Describe their operationalization of this concept. I.e., how did they measure it?
4. Is their measure reliable? Why or why not?
5. How did they assess the measure's validity? Based upon their conclusions, is the measure valid?
6. What is the level of measurement at which their concept is operationalized?
